*Plant guard*

**Protect your plants from grass, weeds and other unwanted vegetation with Lkanten<sup>®</sup> Plant guard.**

**Lkanten<sup>®</sup> Plant guard** is an easy and effective way to protect roots on both delicate and newly set plants in your lawn, flower bed or gravel setting. The funnel makes the water and fertilizers stay with the plant, and at the same time it protect the plants from ingrowing grass and weeds. Plant Guard is one of the products in the **Lkanten<sup>®</sup>** product range and is available in three variants.

Plant Guard with 12 mm narrow border.  
H: 13 cm Ø 23 cm.  
This is great if you do not want the plant guard to appear.

Plant guard with a 50mm wide edge and 30mm high rear edge.  
H: 16 cm Ø 23 cm.  
This variant also keeps mulch and soil in place while keeping gravel, shingle, etc., away from the plant.

Plant guard with a 50mm wide edge .  
H: 13 cm Ø 23 cm.  
This is ideal when you want to run with the lawn mower right on the edge and avoiding trimming the lawn edges.
